

# CheckMate Plus

## SELF-SERVICE ATTENDANCE KIOSK

CheckMate is a fully integrated attendance tracking system within Infinite Campus. This tool features check in/out options for students, guests, substitutes, and employees. CheckMate saves attendance clerks time by allowing students to check-in or check-out using a self-serve kiosk. The attendance data is written directly back to Infinite Campus which means no double entry of data.

### Benefits

- Fully integrated with Infinite Campus
- Real-time attendance tracking
- Save attendance clerks time

# CheckMate Pro

CheckMate Pro features the same functionality as CheckMate Plus and also includes:

- the ability to enable Georgia Sex Offender Registry check (other states coming soon).
- the ability to create a custom greeting message on the kiosk.
- the ability to customize the kiosk colors.

# CheckMate Pro+Volunteer

CheckMate Volunteer features the same functionality as CheckMate Pro and also includes:

- the ability to track volunteers using an online application with an approval process.
- the ability to manage the number of hours and location each volunteer has worked.

CheckMate is simple, straightforward, and well worth the money investment. We have found it is saving an average of 90 minutes per day for each of our attendance clerks. It runs live data, thus check in/out are immediately recorded into Campus' attendance.

## Features

### Check In/Out

Check students in and out of school with the use of a kiosk. Attendance data writes back to Infinite Campus in real time.

### Hall Passes and Name Badges

With the use of a label printer, print hall passes and name badges on-demand.

### Behavior Referrals

Create behavior referrals automatically in Infinite Campus based on attendance related criteria.

### Track Guests and Substitutes

Easily track guests or substitutes who are entering your building with driver's license scan and web cam functionality. Print name badges for guests and substitutes to wear while in your building.

### Who is In the Building?

Administrators can quickly see who is in the building at any time with the "Who is In the Building?" report.
