

ETCH

ERROR TRACKING, CHECKING & HANDLING

ETCH is a fully integrated error tracking, checking, and handling system within Infinite Campus. This tool currently features FTE, DATAmate, Student Class, Student Record, CCRPI and MARS.

Benefits

- Fully integrated with Infinite Campus
- Ability to work on correcting state reporting errors ahead of time
- Step-by-step instructions on error correcting
- FTE estimated funding report
- Principal sign-off

ETCH allows us to clear many of our FTE, Student Class, and Student Record errors before the DOE portal is open. ETCH is highly customizable by the district and K-12 Solutions Group has been very responsive to any changes or additional capabilities that we request. I'm not sure how we would get everything done without ETCH

Warren Steadman
Whitfield County Schools

ETCH is amazing. It has really helped us keep our state errors down and our data clean. It helps us not be in a crunch when it is time for sign-off. It also takes you right where you need to go to fix the issue.

Sarah Kytte
Gainesville City Schools

Features

FTE

FTE features estimated district funding reports, district errors, process to validate errors, principal sign-off, and many report options.

DATAmate

DATAmate is our new data health check. Why wait for a data collection cycle to begin working on cleaning your data? This tool allows staff to review and correct data errors throughout the year.

Student Class and Student Record

Student Class and Student Record allow districts to review and validate errors. They also feature a principal sign-off.

CCRPI

CCRPI features a Grad Rate report to assist schools with their projected graduation rate.

MARS

MARS is a tool to manage at risk students. Customize MARS portal settings for your districts needs.
